

Ivy League Universities – USA

There are 8 universities belonging to the prestigious Ivy League.

The Ivy League started as an athletic association in 1954 but is now known for its social elitism and selectivity in admissions. These eight universities are privately-owned and rank in the top 1% of the world's academic institutions in terms of endowments.

The Ivy League universities boast academic excellence and students from good family backgrounds. President Bill Clinton and President Bush graduated from Yale University, for instance.

In Singapore, many ministers and top civil servants are graduates of Harvard University.
